🔗 My Portfolio

Skills

JavaScript (2.5 years of experience), TypeScript (1), React.js (2), React Native (1), Next.js (1), Node.js (1), CSS (2), SCSS (1), Tailwind CSS (2), HTML (1), REST APIs (2), Nest.js (1), Express.js (1), GraphQL (1), Git/GitHub (2.5), Serverless (1), AWS Lambda (1), AWS S3 (1), NoSQL (1), MongoDB (1)

Professional Experience

06/2025 – 07/2026
Karachi, Pakistan

Software Engineer (Frontend), Strugbits Pvt. Ltd.

Developed and shipped web and mobile applications for international clients, applying my React, Next.js, React Native and Wix skills to translate product requirements and UI designs into production-grade projects. Worked on frontend development, API integration and cross-platform testing. Key projects include:

Project: Eijent – AI-powered transcription app

- Worked on a React Native mobile interface from Adobe XD designs for a meeting/calls recording and summarization app.
- Evaluated and integrated third-party npm libraries for audio playback, recording and waveform visualization to create a custom audio player and recorder UI.
- Integrated backend REST APIs and implemented state management for state sharing in the highly modular application.
- Implemented interface animations, improving interaction feedback and the overall UX of the application.
- Performed cross-platform testing across iOS and Android phones and tablets, identifying and resolving responsive, layout and compatibility issues before delivery.

Technologies used: React Native, Tailwind CSS, npm audio libraries.

Project: Ancestro – clean-energy subscription platform.

- Developed frontend applications in Next.js for a solar provider, facilitating customer subscription and public-facing marketing.
- Translated Figma designs into responsive interfaces with Tailwind CSS styling, ensuring consistent layouts across desktop and mobile.
- Integrated Wix CMS and APIs with multi-step forms, enabling the client to manage content and support automated customer email workflows.
- Used Next.js caching strategies to improve page delivery and low-latency.

Technologies used: Next.js, Wix SDK, Vercel

11/2023 – 04/2025
Karachi, Pakistan

Full Stack Developer, Fission Tech

Worked in a four-person team developing React and React Native frontends, Node.js backends, and NoSQL database solutions. Key projects include:

Project: Mediapilot.io - Video streaming Infrastructure service

- Developed interface in React for video scheduling, including interactive calendar components and drag-and-drop functionality.
- Designed and implemented responsive layouts from desktop-only Figma designs, making decisions for mobile and tablet layout design.
- Implemented Redux-based state management in the application for integrating REST APIs that were for media uploads, schedule creation and retrieval.
- Developed processing workflow using FFmpeg, converting uploaded MP4 files into HLS-compatible .m3u8 playlists and .ts segments for adaptive video streaming.
- Implemented asynchronous background processing with BullMQ for video transcoding and thumbnail generation.

Technologies used: *React.js, Express.js BullMQ.*

Project: *Fantom – Smart-home lighting app.*

- Implemented app screens in React Native that were visually interactive for connected smart-lighting device management.
- Translated UI to be responsive in both layout and portrait mode.
- Integrated AWS IoT Core(MQTT protocol) to enable communication between the application and the lighting hardware.
- Developed, tested, and refined features from written technical requirements.

Technologies used: *React Native, Nest.js, AWS IoT Core*

Education

2023 – 2025 Karachi, Pakistan	M.Sc. Software Engineering, <i>Mohammad Ali Jinnah Univeristy</i> GPA: 3.60 / 4.00 (ECTS / German Grade: 1.5)
2016 – 2020 Hyderabad, Pakistan	B.E. Electronics Engineering, <i>Mehran University of Engineering and Technology</i> GPA: 3.55 / 4.00 (ECTS / German Grade: 1.5)
